Manual Test cases for Luma UI app

Shopping Cart

SC-01: Add single product to cart

- Go to homepage and login as a Customer
- Search for "Zing Jump Rope"
- Click "Add to Cart"
- Click the shopping cart icon
- Click "View and Edit Cart" link
- **Expected**: Product is shown in cart with correct name, price, and quantity

SC-02: Add multiple different products to cart

- Add two or more distinct products
- Open cart
- **Expected**: All selected products are listed with correct prices

SC-03: Increase product quantity in cart

- In cart, change product quantity to 2
- Click "Update Shopping Cart" button
- **Expected**: Subtotal and shipping update correctly

SC-04: Remove product from cart

- In cart, click trash can icon next to a product
- **Expected**: Product disappears and totals update

SC-05: Cart shows correct subtotal, shipping, and total

- Add known product
- Check subtotal, shipping, and final total
- **Expected**: Final total = subtotal + shipping

SC-06: Cart persists in same session

- Add a product
- Navigate away and return to cart
- **Expected**: Product is still in cart

SC-07: Checkout with empty cart

- Remove all items from cart

- Wait for the page to asynchronously load
- **Expected**: User cannot proceed to the checkout. The cart is empty.

SC-08: Add an item from the "More Choices" section

- Add a product to cart and go to shopping cart page
- Scroll to the "More choices" section if it exists for that product.
- Add a product to cart from this section.
- **Expected**: Page reloads and the new product is added.

SC-09: Cart shows correct total with applied discount

- Add at least 3 products for discount to appear
- Check subtotal, shipping, discount and final total
- **Expected**: Final total = subtotal + shipping - discount

Search

SR-01: Search by full product name

- Enter "Zing Jump Rope" in search bar
- **Expected**: Matching product appears in results
